Conversion and review notes

- SCY = short-course yards; SCM = short-course meters; LCM = long-course meters. An asterisk (*) is preserved from the original yards cut; its meaning was not defined in the source.
- For 25–200 events, SCM estimates use SCY × 1.11; LCM estimates add 0.80 s (50), 1.20 s (100), or 3.20 s (200) to the SCM result. These approximate the draft's existing conversion pattern; they are not official governing-body conversion formulas.
- For 500-yard freestyle, the corresponding metric race is generally 400 meters; estimates shown use 500-yard time × 0.875 for 400 SCM and add 6.40 s for 400 LCM. The event remains labeled "500 Free" to preserve the original yards program.
- 25-meter LCM entries are omitted. The original contained several conflicting or malformed values, including 8&U boys 25 Breast, 11–12 girls 50 Breast, and 15–19 500 Free. Verify yards cuts and all conversions before publication.
